

Ready for MRV reporting?

Monitoring, reporting and verification of EU ETS emissions is mandatory for Offshore Ships (400+GT) from 1.1.2025

Streamlined process with Maress

Why Choose Maress MRV?

1

Reduce the MRV administration

2

Use the data already reported

3

Seamless integration with verifiers

4

Designed for offshore operations

5

Leveraging expertise in automated reporting (DCS, NOx)

Key Functionalities

1

Share MRV data with 3rd parties, simplifying EU ETS accounting

2

Breakdown of MRV emissions by projects and clients for better insights

3

Supports verification and validation of voyages

4

Keep all verification documents (BDN, Certificates, etc.) in one place

5

Status reports for your vessels and fleet at your fingertips

MRV & DCS emissions monitoring

Emissions overview 2025

Whole fleet | North Sea 1 | North Sea 2 | Brazil | Singapore

Time period
Equinor, Gudrun, 11.24 - 03.04.25

Time spent at sea 76 004 hours	Distance travelled 98 554 nm	Cargo carried 458 566 mt	MGO 68 mt	LNG 3654 mt
GHG emissions 120 mt CO2e	CO2 emissions 8771 mt	CH4 emissions 89 mt	NO2 emissions 120 mt	

Annual status

- 2025
- 80 voyages verified
- 6 voyages pending submission
- 2 voyages missing required data

BDN coverage
10% 371/3746 mt

2025	-	-	-
