

Marine Fuel Procurement & Operations Optimisation

VPS MyFuels is a powerful online application within the VPS Verisphere platform, designed to help marine operators, fuel purchasers, and technical teams optimise fuel procurement strategies and improve operational performance.

Fuel quality insights

Procurement optimisation

Operational excellence

Turn Fuel Data Into Business Intelligence

- Global Fuel Quality Intelligence
- Procurement Performance Analytics
- Operational & Purifier Performance Improvements

Smarter Fuel Insights

By combining fuel quality intelligence with procurement and operational performance data, MyFuels delivers actionable insights that support:

- Improved fuel purchasing strategies.
- Enhanced vessel performance.
- Better risk management.
- Increased operational efficiency.
- Continuous performance improvement across your fleet.

Key Benefits

- Analyse fuel oil quality trends by fleet, vessel and equipment type.
- Identify fuel quality risks and recurring issues.
- Review fuel oil test results in intuitive online dashboards.
- Track global and regional fuel quality trends.
- Optimise procurement with key performance indicators.
- Improve operational reliability and purifier performance.
- Gain a deeper understanding of fuel chemical properties and the marine engineering domain through the user-friendly dashboards, which provide immediate insights into key risk areas, along with opportunities for optimization.
- Set up the scheduled reporting option to receive regular recurring email reports, proactively notifying users of important insights.
- Customise and tailor dashboards and reports to customer requirements.
