

Bunker Survey Data Analytics

Transform bunker survey data into actionable procurement and operational insights.

MySurveys is a powerful online application within the VPS Verisphere platform, providing comprehensive analysis of bunker survey data to support procurement, operational and commercial decision-making. The application enables users to evaluate supplier performance across key commercial and operational indicators. From high level ports and supplier trends to granular barge views, users can leverage MySurveys to save time and cost.

Survey intelligence

Procurement optimisation

Operational excellence

Turn Survey Data Into Performance Improvement

- Port Performance Benchmarking
- Supplier Comparison & Evaluation
- Bunker Tanker Efficiency Analysis

Smarter Bunker Intelligence

Improve Procurement & Operational Outcomes

By consolidating bunker survey data into intuitive dashboards and reports, MySurveys helps organisations:

- Drive down bunker costs.
- Improve fuel supplier selection and management.
- Tighten Fuel Loss Control.
- Achieve continuous Operational improvement.

Key Benefits

- Monitor Supplier performance and benchmarking.
- Monitor Port performance and benchmarking.
- Monitor Operational Efficiency.
- Improve bunker procurement decisions based on data-driven insights.
- Identify opportunities to reduce losses and improve transparency.
