

EXPERIENCE ▶ INNOVATION ▶ SUSTAINABILITY

VPS OIL CONDITION MONITORING (OCM) FOR FERRY OPERATIONS

Maximize Uptime. Reduce Cost. Eliminate Guesswork.

Ferries run on tight schedules with high passenger expectations and limited downtime.

VPS OCM delivers real-time insight into machinery condition. Act before failures impact service, safety, or revenue.

24/7

TECHNICAL ASSISTANCE

From experienced lubrication experts.

WHY FERRY OPERATORS USE VPS

PROTECT YOUR ASSETS

Detect issues early and prevent costly breakdowns.

REDUCE DOWNTIME

Stay on the water, increasing maintenance intervals.

LOWER OPEX

Extend oil life and reduce maintenance costs.

COMMERCIAL AGILITY

Independent testing creates greater leverage with lube suppliers.

DATA-DRIVEN DECISIONS

Make smarter maintenance decisions with confidence.

HOW VPS OCM WORKS

SAMPLE

Simple sampling procedures to ensure representative samples obtained from equipment.

SEND

Free sample kits & logistics via Samplogic.

ANALYZE

Supported by MLA certified experts.

REPORT

Results in 3-5 days with full report on customer portal.

ACT

Take action with expert guidance and support.

GLOBAL EXPERTISE | TRUSTED RESULTS

3 STRATEGIC LABS

Houston, Rotterdam & Singapore.

MLA-CERTIFIED TECHNICAL ADVISORS

Experienced experts supporting your fleet.

24-HOUR TECHNICAL SUPPORT

Dedicated Technical Account Manager per customer.

MARINE FOCUS

Trusted by operators worldwide.

RUN A PILOT ON YOUR FLEET

We will prove value fast, typically within the first sampling cycle.
